

# The Complete Fall Protection Providers

Keeping You Safe at Height

---

# Invest in Peace of Mind

When it comes to installing and maintaining fall protection it's not just compliance issues that might keep you awake at night. More importantly, it's the fact that you're responsible for people's safety – and indeed their lives.

That's why it pays to find a partner with the highest levels of experience, expertise and willingness to go the extra mile.

With HCL at your side you can be confident you have the best solution, implemented by genuine experts using industry leading products to minimise your fall protection risk.

## A Proven Track Record

Our 30 years of experience in delivering installation and maintenance solutions offers you the utmost confidence in working safely at height.

## World Leading Resources

We are part of MSA Safety, global leaders in our industry. You benefit from the very latest thinking, product innovation and regulatory guidance in fall protection.

## The Finest Fall Protection Products

Providing leading fall protection products, including MSA's Latchways systems, we provide you with a complete range of quality safety at height solutions.

## All-round Solutions and Services

Whatever you need, from a bespoke system for a new build or a refresher course in working at height for your staff, we have it covered through our various divisions.

## The Service You Want, When You Need It

Every part of our service has your needs at its heart. From our responsive customer service team to our skilled field technicians, we're dedicated to keeping your business working safely at height.

*"It pays to find a partner with the highest levels of experience, expertise and willingness to go the extra mile."*

## Your Safest Choice for Fall Protection

All elements of our service add up to a first class fall protection offering – to help you enable workers at height do their job safely and with complete confidence.

### New Build Installation

Involve us at the design stage for optimum results. Many of our products have BIM models and our wide portfolio guarantees your system will be designed to the individual requirements of your structure. Architects know we care about design and our service always reflects the aesthetic.

### Retrofit Installation

Whatever shape or size of structure, however long it is and wherever it's sited, we are the team to solve your fall protection problems. From bridges to tourist attractions to historic buildings, we have the knowledge, experience and products to deliver the solution.

### Inspection and Certification

Dealing with HCL means we can let you know when your test inspections and certification are due, keeping you free of legislative penalties. Thanks to our huge knowledge bank, not only can our technicians identify any problems, but they are qualified to fix it on the spot, and that saves you time and money.

### Training

A safe fall protection solution is one thing, empowering your employees with the knowledge to use them is quite another. We know your company's time is valuable, so our training can be arranged on-site to deliver everything your people need to work at height safely.

### Servicing

Our service technicians are unsurpassed in the industry. Should you require a product service, we have an outstanding response team with the expertise to repair your instruments in a reliable and timely manner.

## New Build Installation

### Full Integration of Safety at Height from Design to Installation

With HCL as your partner from the word 'go' you can make sure you have the best technical advice, service and quality safety at height systems to keep you compliant at every stage of your new build. Our close relationships with the best product providers and our own proven record of design and implementation means you can rest assured that you are in the best of hands.

### Ensuring Everything Goes to Plan

We work with you to ensure every stage of the process is delivered to plan, using our network of field technicians and CDM technical support on tap. And with our wealth of onsite technical knowledge and experience we can find smart compliant solutions for any unforeseen implementation challenges without fuss or bother.

*"We'll make sure you have quality safety at height systems to keep you compliant at every stage of your new build."*

HCL Safety are the only fall protection company to have an Employee Safety Training Assessment recognised by CSCS for 'Personal Fall Protection Installer - for Permanent Solutions'.

All HCL Installation Technicians hold CSCS cards providing proof that individuals working on construction sites have the required training and qualifications for the installation of permanent fall protection equipment. Most principal contractors require construction workers on their sites to hold a valid CSCS card.

## Retrofit Solutions

### Bringing Simplicity to Complexity

Buildings and structures come in all shapes and sizes, which can make the retrofitting of working at height systems extremely tricky. Fortunately, there are few challenges left that we haven't overcome.

### Keeping it Compliant

Our 30 years of retrofit experience means we can tailor-make an effective solution for your building, one that meets all legislative and regulatory requirements - and fits your budget.

Using smart combinations of fall protection products from leading global providers we design your solution to be elegant and fully compliant, no matter what problems your building throws up.

Regulations are ever-evolving and our technical team makes sure our systems are as future proof as possible for stress-free solutions.

### A Comprehensive Range of Solutions Including:

- Guardrails for collective protection
- Non-slip walkways
- Cable systems for fall restraint, fall arrest and rescue
- PPE Solutions

We are also registered installation partners for MSA's Latchways® range

*"Our 30 years of retrofit experience means we can tailor-make an effective solution for your building."*

# Inspections and Certification

## Keeping you Safe and Legal

By periodically testing and certifying your system we can make sure your workers are safe and keep you within the law. We check all aspects of your system and equipment in line with current UK legal requirements to give you complete peace of mind.

## Wherever you are, We can help

With our nationwide network of field technicians we can test and maintain your fall protection systems anywhere in the UK. This makes it simpler if you have multiple sites as we can establish a tailored programme of testing to an agreed schedule and to the same exacting standards.

## Our experience is your guarantee

We have a dedicated team of highly trained I & C technicians who are experienced in the installation, use and testing of safety at height systems. They use proven procedures and specialist equipment.

## Leaving Nothing to Chance

We keep a detailed record of all systems and past inspections on a secure database. This means we can contact you when a test is due, and our testing technicians can acquaint themselves with your system's specification before they make their visit. You won't ever have to worry about a system falling behind its inspection date.

## Testing and Maintaining in One

Our field technicians will do more than just test your system. If they spot that system maintenance is needed, they are qualified and often equipped to carry it out there and then - saving you time and hassle.

*"We check all aspects of your system and equipment in line with current UK requirements to give you complete peace of mind."*

# Training and Servicing

## Choose from a full range of off-the-shelf and tailored professional training modules, including:

- Height safety awareness
- Inspection and use of personal protective equipment (PPE)
- Pre-use inspection of fall protection systems
- 'Basic user' of fall protection systems
- 'Intermediate user' of fall protection systems
- 'Advanced user' of fall protection systems (includes rescue)
- Risk assessments, method statements and permits to work

## Using Fall Protection Safely

Our full range of training courses will help your team use fall protection systems with confidence. They'll also learn to easily recognise fall hazards and implement a rescue if needed. Led by experienced trainers, we tailor the courses to fit your workforce, your site and your requirements.

## Meeting your Legal Obligations

We can help you identify individual competency to work safely at height. In this way you'll meet your legal obligation under the Health & Safety at Work Act 1974, minimising risk and ensuring that work activities can be conducted safely.

## Unsurpassed Servicing Standards

Alongside the extensive offering of fall protection installation, annual inspection and training, HCL also provides a high level of customised product servicing. Our service technicians are unsurpassed in the industry. Should you require an MSA Safety SRL or harness service, including Latchways® and V-Series ranges, we have an outstanding response team with the expertise to inspect and, if appropriate, repair your fall protection products in a reliable and timely manner.

All HCL's service technicians are fully trained through MSA Safety and must be re-certified every two years to retain their service certification.

*"We can help you use fall protection systems with confidence and meet your legal obligation under the Health & Safety at Work Act 1974."*

## HCL – An MSA Safety Company

---

*MSA Safety Incorporated is the global leader in the development, manufacture and supply of safety products that protect people and facility infrastructures. From specification, through planning to purchase and implementation MSA Safety assures companies of high performance products and expert partnerships at every point of the journey. So you can be certain that your fall protection needs are covered.*

### Our Mission

---

MSA's mission is to see to it that men and women may work in safety and that they, their families and their communities may live in health throughout the world.

**Because every life has a purpose.**
